#	QUALITY ATTRIBUTE	DESCRIPTION	MEASUREMENTS	PRIORITY
QA1	Usability	The interface must be intuitive, follow consistent design patterns, provide clear feedback, and meet WCAG 2.1 accessibility standards.	≤ 2 min onboarding WCAG 2.1 compliant	High
QA2	Functional Suitability	The system must produce accurate and complete results, cover all required features, and correctly handle edge cases.	≥ 99% accuracy All edge cases handled	High
QA3	Scalability	The system must support up to 1,000 concurrent users via dynamic cloud scaling, with no performance degradation during peak load.	≤ 2s response time ≥ 1,000 concurrent users	Medium
QA4	Cost Efficiency	Infrastructure and maintenance costs must stay within a predefined monthly budget, with predictable and transparent scaling estimates.	Within monthly budget Transparent cost forecasts	Medium
QA5	Compatibility	The system must integrate with external systems via standard APIs and function across mobile, tablet, and desktop browsers.	REST / JSON standard Mobile, tablet, desktop	Medium
